

Luiz Henrique Bueno

Belo Horizonte, Minas Gerais, Brazil · +5531995557911 · luizbueno2@gmail.com · <https://www.linkedin.com/in/luizhenriquebueno/> · <https://github.com/luizgringo> · <https://luizbueno.com>

Summary:

I began my professional journey in I.T. in 2007, and since 2009, I have specialized in developing both frontend and backend systems for web-based applications. Over the years, I've built a strong foundation in designing and delivering robust, user-focused solutions.

I hold a Bachelor's Degree in Information Systems and a Postgraduate Certificate in Web Development Systems from Pontifícia Universidade Católica de Minas Gerais (PUC-Minas). My passion for improving user experience inspired me to pursue an additional Postgraduate Certificate in UX Design and Agile Frameworks from Pontifícia Universidade Católica de Minas Gerais (PUC-Minas) too, which equipped me with advanced knowledge in UX principles and agile methodologies.

My professional experience includes leading development teams and fostering growth in others. As a Scrum Master, I earned the Professional Scrum Master (PSM) certification from Scrum.org, strengthening my ability to manage and deliver projects effectively. Additionally, my role as a Technical Lead involved mentoring a team of developers, defining technical strategies, and driving collaboration. This role inspired me to deepen my expertise, culminating in completing the Tech Lead training program at IFTL.

As a developer, I am driven by a desire to create impactful and intuitive user experiences. I take pride in building applications that are not only functional but also friendly, effective, and meaningful. Whether it's solving complex technical challenges or leading a team to success, I am passionate about delivering excellence in every project I undertake.

Experience:

Cactus Gaming

Nova Lima, Minas Gerais, Brazil

Senior Frontend Developer

March 2025 - Today

- Cactus Design System Overhaul (v2.0.0): Led the complete re-architecture of a production React component library into a zero-runtime, accessibility-first Design System.
- Migrated inline/JS-driven styles to static CSS, centralized tokens via DTCG/Style Dictionary, and reached approximated 97% test coverage. (Tech: React, TypeScript, Vanilla Extract, Radix UI, Vitest, Storybook, GitHub Actions, Gemini AI)
- Ecosystem Scale & Standardization: Active member of the Front-end Chapter, responsible for maintaining and improving 33 iGaming platforms, ensuring code standardization, quality, and visual consistency across the board.
- Core Development: Built high-performance iGaming applications using Nuxt 3, Vue.js 3, TypeScript, and Tailwind CSS, focusing on excellent user experience.
- Interface Implementation: Designed and developed user interfaces based on Figma prototypes, aligning complex designs with usability best practices.
- Team Building: Led recruitment processes for new developers, including technical interviews and skills assessments.
- Engineering Processes: Managed version control, code reviews, and continuous integration workflows using GitHub.
- Agile Management: Organized and prioritized tasks utilizing Jira and Kanban methodologies to optimize delivery timelines.

- Technical Documentation: Authored comprehensive documentation using Confluence and TSDoc, ensuring traceability and clarity for all implementations.

Used Skills: *Used Skills: React, TypeScript, Vanilla Extract, Radix UI, Design Systems, Style Dictionary (DTCG), Storybook, Vitest, Vue 3, Nuxt 3, Vite, Pinia, Tailwind CSS, Figma, GitHub, GitHub Actions, Code Review, CI/CD, TSDoc, Confluence, Jira, Kanban, Technical Documentation, Technical Interviews, Architectural Direction, Accessibility (WCAG/ARIA), Gemini AI, Claude (Anthropic), Cursor.*

ETUS Media Holding

Belo Horizonte, Minas Gerais, Brazil

Tech Lead

May 2024 - December 2024

- Led architectural direction and development for the Brius For Acquisition application, utilizing Vue.js 3, Vite, Pinia, and Sass for the frontend, and Node.js for the backend.
- Developed a generative AI-powered bootstrap (integrated with Claude Sonnet by Anthropic and Cursor.sh) for Brius/Etus administrative systems.
- Served as a key liaison between the development team and C-level executives, delivering technical insights and driving alignment in strategic planning and technical decision-making to achieve business objectives.
- Managed tasks and tracked progress using Kanban workflows in JIRA, ensuring project alignment, accurate estimating, and timely delivery.
- Conducted task refinement sessions with the development team to clarify objectives and improve execution efficiency.
- Documented activities, workflows, and system flows using Confluence, ensuring transparency and efficient knowledge sharing.
- Developed comprehensive technical specifications and guidelines to maintain consistency in technologies and application development.
- Created detailed roadmaps to support strategic planning and the implementation of new features for BRIUS systems.
- Mentored junior developers, fostering their growth and improving team productivity through enhanced technological direction.
- Facilitated Individual Development Plan (IDP) processes to support the professional growth of team members.
- Served as a Servant Leader, proactively addressing team challenges and removing impediments to maintain productivity.

Used Skills: *Architectural Direction, Strategic Planning, Cursor.sh, Claude by Anthropic, ChatGPT, Github Copilot, Vue.js 3, Nuxt.js, Vite, Pinia, HTML, CSS, Javascript, Typescript, SASS, Tailwind CSS, Node.js, Strapi, Wordpress, PHP, Kanban, Jira, Task Refinement, Confluence, Roadmap Planning, Mentoring, IDP Development, Tech Leadership, Process and Systems Documentation.*

ETUS Media Holding

Belo Horizonte, Minas Gerais, Brazil

Senior Fullstack Developer

January 2024 - May 2024

- Development of the Brius For Customer application using Vue.js 3, Vite, and Sass on the frontend, and Nest.js on the backend.
- Built applications leveraging the Google Cloud Platform infrastructure.
- Conducted comprehensive system testing to ensure quality and reliability using Jest.
- Utilized Figma for UX design and prototyping.
- Managed version control of applications using GitLab.
- Oversaw task management and activity tracking with Kanban, supported by Monday.

Used Skills: *Vue.js 3, Nuxt.js, Vite, Pinia, HTML, CSS, Javascript, Typescript, SASS, Tailwind CSS, Node.js, Nest.js, Wordpress, PHP, Google Cloud Platform - GCP, Figma, Gitlab, Kanban, Monday.*

Globoplay @ Globo Comunicação e Participações S.A

Rio de Janeiro, Rio de Janeiro - Brazil

Senior Software Developer

February 2022 - October 2023

- Developed the Globoplay application for TVs, a platform with nearly 40 million users, using React.js, TypeScript, CSS Modules, and Apollo GraphQL, delivering a seamless viewing experience.
- Conducted comprehensive system testing with Jest, ensuring high-quality performance and reliability across devices.
- Designed and prototyped user experiences using Figma, optimizing interface usability for Smart TV environments.
- Managed version control and streamlined collaborative development using GitLab.
- Oversaw task management and tracked progress with Kanban, leveraging JIRA to maintain team alignment and meet delivery timelines.
- Documented system activities, workflows, and processes using Confluence, enhancing knowledge sharing and operational transparency.
- Created and maintained detailed technical specifications to guide the development and deployment of the application on smart TVs and set-top boxes, ensuring scalability and maintainability.
- Led recruitment processes, successfully onboarding new developers to strengthen the team.
- Facilitated task refinement sessions, improving task clarity and alignment, which enhanced development efficiency and reduced delays.

Used Skills: *React.js, HTML, CSS, Javascript, SASS, TypeScript, CSS Modules, Apollo GraphQL, Jest, Figma, Gitlab, Kanban, Jira, Confluence, Recruitment Process Leadership.*

Kyte Tecnologia de Software

Florianópolis, Santa Catarina - Brazil

Senior Frontend Developer

August 2021 - December 2021

- Designed, developed, and maintained components for Kyte's Design System, ensuring consistency and reusability across applications.
- Built a robust web application using the Flux architecture with React.js and Redux, enhancing application performance and scalability.
- Managed version control and collaborative workflows using Git, ensuring seamless integration and code quality.
- Deployed applications efficiently using the Azure DevOps infrastructure, streamlining the release process.
- Oversaw task management and progress tracking with Kanban, leveraging Azure Boards to maintain project alignment and meet deadlines.

Used Skills: *React.js, HTML, CSS, Javascript, SASS, TypeScript, Redux, Git, Azure DevOps, Kanban, Azure Boards.*

Localiza Rent A Car S.A

Belo Horizonte, Minas Gerais - Brazil

Senior Software Developer

March 2021 - August 2021

- Developed Zarp application using React.js and CSS Modules, delivering responsive and scalable user interfaces.
- Managed version control and collaborative workflows using Git, ensuring code quality and streamlined development.
- Deployed applications efficiently through Azure DevOps, optimizing the release process and system stability.
- Oversaw task management and progress tracking using Scrum methodology, supported by Azure Boards, ensuring timely delivery of sprints.
- Conducted in-depth user experience analysis and evaluated metrics with Yandex Metrika and Hotjar, driving insights to improve usability and user satisfaction.

Used Skills: *React.js, CSS Modules, HTML, CSS, Javascript, SASS, Git, Azure DevOps, SCRUM, Azure Boards, Yandex Metrika, Hotjar.*

Arbeit Software

Belo Horizonte, Minas Gerais, Brazil / Buffalo, New York - USA

Senior Frontend Developer

February 2020 - February 2021

- Refactored C++ code using Clang Power Tools.
- Developed desktop system interfaces using Electron.js, Vue.js, and integration with Qt Framework and C++.
- Built application interfaces with Angular 9, TypeScript, RxJS, and Websockets.
- Produced comprehensive system documentation using Compodoc, ensuring clarity and accessibility for developers.
- Developed applications with React.js, CSS Modules, TypeScript, and Websockets.
- Managed version control of applications using GitLab.
- Developed a scalable Design System featuring reusable and modular components in React.js, using TypeScript for type safety, CSS Modules for scoped styling, Rollup.js and Babel.js for efficient bundling and transpilation, and Storybook for documentation and component testing.

Used Skills: *English, C++, Electron.js, QT Framework, Angular 9, HTML, CSS, Javascript, Typescript, RxJS, Websockets, Compodoc, React.js, CSS Modules, GitLab, Design System Development, Rollup.js, Babel.js, Storybook.*

Hotmart

Belo Horizonte, Minas Gerais, Brazil

Frontend Developer

March 2018 - January 2020

- Developed robust applications utilizing modern frontend technologies, including Vue.js, Nuxt.js, Webpack, and Progressive Web Applications (PWA) with Service Workers.
- Implemented backend solutions using Node.js and Express.js, while employing tools such as Yarn, NPM, and Bulma for package management, styling, and optimization.
- Designed email marketing layouts using the Pug.js template engine.
- Created websites and landing pages using Bootstrap, Require.js, Gulp.js, and Sass.
- Managed version control of applications using GitHub.
- Conducted research, analysis, and development of A/B tests focused on conversion optimization for company platforms.
- Automated platform testing using Selenium IDE and Katalon Studio.
- Conducted user experience research and satisfaction analysis, utilizing NPS metrics supported by Hotjar.
- Applied the Heart Framework to define UX metrics and KPIs.

Used Skills: *Vue.js, Nuxt.js, Webpack, Progressive Web Applications (PWA), Service Workers, Node.js, Express.js, HTML, CSS, SASS, Javascript, Yarn, NPM, Bulma, Pug.js, Bootstrap, Require.js, Gulp.js, GitHub, A/B Test Conduction, Selenium, Katalon Studio, NPS Analysis, Hotjar.*

Lett Insights - Inteligência em e-commerce

Belo Horizonte, Minas Gerais, Brazil

Scrum Master / Full Stack Developer

July 2016 - January 2018

- Developed the company's administration and management system using Backbone.js, Require.js, Underscore.js, Node.js, Express.js, and Strongloop, supported by tools like Bower, Grunt, Yeoman, and Bootstrap.
- Managed version control of applications with Git and Bitbucket.
- Administered MongoDB and PostgreSQL databases to ensure efficient data management.
- Enhanced system code quality leveraging SonarQube insights.
- Defined and implemented the Scrum process, aligning the team with agile methodologies.

- Trained and mentored the development team on Scrum practices and rituals.
- Facilitated sprints by resolving team impediments and tracking progress using Kanban boards.
- Collaborated with the Product Owner to define user stories and refine requirements.
- Designed UML-based entity-relationship diagrams and created system use cases.
- Developed interactive prototypes and mockups with MyBalsamiq and InVision, improving design clarity and user alignment.

Used Skills: *Backbone.js, Require.js, Underscore.js, Node.js, Express.js, Strongloop, HTML, CSS, Javascript, Bower, Grunt, Yeoman, Bootstrap, Git, Bitbucket, MongoDB, PostgreSQL, SonarQube, SCRUM Implementation, UML Modeling, MyBalsamiq, InVision.*

Empresa 1 @ Squadra Tecnologia

Belo Horizonte, Minas Gerais, Brazil

Systems Analyst

May 2015 - March 2016

- Delivered key software solutions at [Empresa 1](#), ensuring alignment with project objectives, strict adherence to deadlines, and high-quality outcomes through effective collaboration and technical expertise.
- Conducted software analysis and development leveraging disciplined agile delivery methodologies such as Scrum, OpenUP, AMDD, XP, and Lean, improving delivery efficiency and quality.
- Designed, developed, and maintained systems using Java (JEE7) with Spring Framework, Hibernate ORM, and Java Persistence API (JPA) for robust backend development, supported by tools like Maven, Git, and Jetty.
- Delivered dynamic and responsive frontend solutions using AngularJS, Bootstrap, and build tools such as Bower, Grunt, and Yeoman to enhance user interfaces.
- Managed and optimized Oracle 11g database operations, including routine maintenance, performance tuning, and ensuring data integrity to support system reliability.

Used Skills: *SCRUM, OpenUP, AMDD, XP, Lean, Java JEE7, HTML, CSS, Javascript, Spring, Hibernate ORM, Java Persistence API (JPA), Maven, Git, Jetty, AngularJS, Bootstrap, Bower, Grunt, Yeoman, Oracle 11g.*

Capgemini Brasil LTDA

Belo Horizonte, Minas Gerais, Brazil

Systems Analyst

July 2013 - May 2015

- Conducted Software Requirements Analysis to align with business needs and ensure technical feasibility.
- Performed Software Analysis, identifying improvements to enhance performance and functionality.
- Developed and maintained systems using Java, UNIFW, JSF, PrimeFaces, Hibernate ORM, and JPA.
- Managed and optimized Oracle 10g and 11g databases.
- Migrated system modules to EJB3, improving scalability, performance, and maintainability.
- Created mobile application layouts with HTML5, CSS3, JavaScript, and jQuery Mobile.
- Designed and implemented WebServices using JAXWS RI for efficient system communication.
- Improved code quality with SonarQube and ensured continuous integration using Jenkins.
- Developed middleware solutions with JBoss 5.1 and Oracle WebLogic Server 12c.
- Created automated reports using iReport and optimized PrimeFaces layouts for responsive, user-friendly interfaces.

Used Skills: *Requirement Analysis, JAVA, UNIFW, JSF, PrimeFaces, Hibernate ORM, JPA, Oracle 10g, Oracle 11g, EJB3, HTML5, CSS3, JavaScript, jQuery Mobile, JAXWS RI, SonarQube, JBoss 5.1, Oracle WebLogic Server 12c, iReport, PrimeFaces.*

SLIIC - Sistemas de Segurança Viária e Ambiental Ltda

Contagem, Minas Gerais, Brazil

Systems Analyst

October 2010 - May 2013

- Conducted Software Requirements Analysis to align system capabilities with business needs.
- Performed comprehensive Software Analysis to identify and address system improvements.
- Developed and maintained systems using Java and the Next Framework, ensuring robust and scalable solutions.
- Implemented unit testing with JUnit to ensure software reliability and performance.
- Managed and optimized SQL Server databases for efficient data storage and retrieval.
- Administered email accounts and portal content through cPanel, streamlining operations.
- Designed, developed, and maintained company portals using WordPress, PHP, and MySQL.
- Configured and managed Cloudflare CDN to enhance website stability and load times.
- Monitored activity and response times with Pingdom, ensuring consistent system performance.
- Optimized portal SEO strategies, improving visibility and ranking on search engines.

Used Skills: Requirement and Software Analysis, JAVA, Next Framework, JUnit, SQL Server, cPanel, Wordpress, PHP, MySQL, Cloudflare CDN, HTML, CSS, Javascript, Pingdom, SEO Strategies Definition.

GCI - GESTAO & CONSULTORIA DE INFORMATICA LTDA

Contagem, Minas Gerais, Brazil

Java Web/JSP Developer Intern

July 2009 - July 2010

- Conducted Requirements Analysis and Software Analysis to support system enhancements.
- Maintained and optimized company software solutions.
- Developed systems using Java with JSP/Servlet architecture.
- Implemented interactive features with JavaScript and AJAX.
- Managed and administered SQL Server databases for reliable data operations.

Used Skills: Requirement and Software Analysis, JAVA, JSP/Servlet Architecture, AJAX, HTML, CSS, Javascript, SQL Server.

Education:

- **Postgraduate Degree - Specialization in UX Design and Agility**, Pontifícia Universidade Católica de Minas Gerais - PUC Minas – MG, Brazil – 2022 (1-year program)
- **Postgraduate Degree - Specialization in Web Application Development**, Pontifícia Universidade Católica de Minas Gerais - PUC Minas – MG, Brazil – 2014 (1-year program)
- **Bachelor's Degree in Information Systems**, Pontifícia Universidade Católica de Minas Gerais - PUC Minas – MG, Brazil – 2012 (5-year program)

Certifications:

- **Tech Lead Program**, IFTL – 2024 - <https://bit.ly/luizbueno-iftl-techlead>
- **EF SET Certificate™ - C2 Proficient**, EF SET – 2022 - <https://cert.efset.org/SLdq8B>
- **Professional Scrum Master I (PSM I)**, Scrum.org – 2019 - <https://www.credly.com/badges/6e801485-b19d-47e9-adaa-89caa7b25571>

Additional:

- Language competencies: Portuguese (Native), English (C1), Spanish (A1).

Industry Knowledge:

- Industry Knowledge:
- System Architecture
- Design Systems
- Component Library Architecture

- Accessibility (WCAG / ARIA)
- Technical and Team Leadership
- Software Documentation
- Code Review
- Pair Programming
- Mentorship and Team Development
- CI/CD & Release Automation
- Agile Methodologies (Scrum, Kanban)
- Agile Project Management
- iGaming Platforms
- A/B Testing and Metrics Analysis
- Software, App and Website Development

Tools and Technologies:

- Frontend: TypeScript, React.js, Vue.js, Nuxt.js, Next.js, Vite, Tailwind CSS, Vanilla Extract, Radix UI, Pinia, Redux, CSS Modules, Styled Components, Sass, Storybook, Element Plus
- Testing and Quality: Vitest, React Testing Library, Jest, JUnit, SonarQube
- Infrastructure and DevOps: GitHub Actions, Azure DevOps, Google Cloud Platform, Amazon Web Services
- Other Technologies: Style Dictionary, Design Tokens (DTCG), TSDoc, Apollo GraphQL, Electron.js, Websockets, PWA, GenAI, ESLint, Prettier, Lefthook, Biome, Jira, Confluence

Interpersonal Skills:

- Interpersonal Skills:
- Team and Technical Leadership
- Cross-functional Collaboration (Design × Engineering)
- Communication and Collaboration
- Training and Mentoring Developers
- Design System Governance & Adoption
- Technical Standards & Code Quality Advocacy

Projects

- ***Cactus Design System — Full Architecture Overhaul (v2.0.0)*** • <https://cactusgaming.net/> • June 2026 - Today
 - Migrated inline/JS-driven styles to zero-runtime CSS (Vanilla Extract), moving hover/focus logic from React state into native browser CSS across 31 components.
 - Built a single source of truth for design tokens (DTCG + Style Dictionary), auto-generating CSS variables and TS types — no more hardcoded hex codes.
 - Adopted Radix UI primitives for accessible, keyboard-navigable overlays (Modal, Dropdown, Tabs) with full ARIA support.
 - Standardized forwardRef + asChild for ref forwarding and polymorphic composition.
 - Reached ~97% test coverage (300+ tests, Vitest + RTL) with enforced CI thresholds.
 - Automated SemVer releases and changelog generation via CI + Gemini.
- ***Cactus Partners Dashboard - Management Platform for Betting Affiliates*** • <https://app.7k.partners/> • July 2025 - Today
 - A modern web dashboard developed with Nuxt 4, Vue 3, and TypeScript for managing bookmaker affiliates. The multi-tenant system supports three languages (PT/EN/ES), has a responsive interface, and a dynamic theme customizable per client. It includes reporting features, affiliate link management, a digital wallet, and analytics dashboards. Stack: Tailwind CSS, Element Plus, Pinia, Chart.js, and VeeValidate.

- **Bet7K - Front-End Development with Vue.js 3, TypeScript & Tailwind CSS** • <https://7k.bet.br>
- **March 2025 - July 2025**
 - Development of Bet7K's iGaming platform, leveraging modern frameworks like Vue.js 3 and TypeScript to build scalable, high-performance interfaces.
 - Implemented Tailwind CSS for rapid UI development, ensuring a responsive and visually appealing user experience.
- **Luther - ETUS Media Holding** • www.etus.digital/ • **November 2024 - December 2024**
 - Developed a generative AI-powered bootstrap (integrated with Claude Sonnet and Cursor.sh) for Brius/Etus administrative systems.
 - Utilized Nuxt 3, Biome, Lefthook, Tailwind CSS, and Brius Design System (built on Vue 3 and Tailwind) on the frontend, with Strapi on the backend.
 - Streamlined the development process, significantly reducing the time required to create new CRUD-based projects.
- **Brius for Acquisition** • ETUS Media Holding • www.brius.com.br • **May 2024 - December 2024**
 - Architectural planning, technical leadership, and development of the Brius For Acquisition application.
 - Utilized Vue.js 3, Vite, Pinia, and Sass for the frontend.
 - Implemented a backend architecture using Node.js.
- **Brius For Customer** • ETUS Media Holding • www.brius.com.br • **January 2024 - May 2024**
 - Led the development of the Brius For Customer application.
 - Used Vue.js 3, Vite, and Sass for a performant frontend.
 - Utilized Nest.js for a reliable backend.
- **Globoplay** • Globo • www.globoplay.globo.com • **February 2022 - October 2023**
 - Developed the video-on-demand application for Globoplay, the largest streaming service in Brazil serving approximately 40 million users nationwide.
 - Implemented HTML version, using React, CSS Modules, and GraphQL for Smart TV platforms.
 - Ensured a high-quality, scalable solution to deliver a seamless user experience.
- **Kyte Web** • Kyte Tecnologia de Software • www.kyte.com.br • **August 2021 - December 2021**
 - Developed the e-commerce management application used by approximately 42,330 small retailers.
 - Used React.js, Redux, Flux, and the Kyte Design System for the frontend.
- **Zarp Localiza** • Localiza • <https://zarp.localiza.com/> • **March 2021 - August 2021**
 - Developed an application to promote Localiza's car rental service for ride-hailing drivers.
 - Utilized React.js, Redux, and CSS Modules for frontend development.
 - Improved user experience and streamlined the rental process for drivers.
- **Cosmik Component Library** • Arbeit Software • **December 2020 - February 2021**
 - Created the Cosmik Design System, a library of reusable React.js components.
 - Used TypeScript, CSS Modules, Rollup.js, and Babel for robust and maintainable code.
 - Utilized Storybook to document and visualize components for seamless team collaboration.
- **Agent Application** • Arbeit Software • www.arbeitsoftware.com • **April 2020 - November 2020**
 - Developed a messaging and calling application used by telemarketing support agents.
 - Used React.js, CSS Modules, and TypeScript for a robust frontend.
 - Utilized WebSockets for real-time communication and efficient call handling.

- **Hotmart - Institutional Website** • Hotmart • www.hotmart.com • August 2019 - September 2019
 - Developed Hotmart's institutional website, the leading platform for selling digital products.
 - Utilized Nuxt.js for improved performance and SEO.
 - Delivered a modern, user-friendly interface to enhance brand presence.
- **Scrum Implementation** • Lett Insights - Inteligência em e-commerce • www.lett.digital • November 2017 - January 2018
 - Led the implementation of Scrum processes within the company.
 - Trained the development team to understand Scrum ceremonies and workflows.
 - Acted as a facilitator and impediment remover for the development team.
 - Provided progress reports on sprints and monitored tasks through the Kanban board.
 - Collaborated with the Product Owner to define User Stories and Tasks.
 - Contributed to the elicitation and analysis of system requirements.
- **Frozen Admin** • Lett Insights - Inteligência em e-commerce • <https://frozen.lett.com.br/#login> • July 2016 - January 2018
 - Architected, developed, and managed the Frozen system, a robust platform for overseeing operations, providing support, and generating analytical reports for Lett Insights.
 - Used Backbone.js, Node.js, Express, StrongLoop, and AWS for a scalable and high-performance environment.
 - Ensured reliability and maintainability, enabling efficient data handling and insightful reporting.
- **Backoffice - Empresa 1** • Squadra Tecnologia • www.empresa1.com.br/solucoes/bilhetagem • May 2015 - March 2016
 - Developed Backoffice system to efficiently manage recharge orders and the issuance of electronic ticket cards, enhancing operational workflow.
 - Implemented robust customer support and credit sales functionalities, ensuring seamless service delivery for users in the metropolitan region of Belo Horizonte.
 - Optimized the electronic ticketing process, resulting in improved accuracy and reduced processing times for transactions.
- **ANP - MCE (Foreign Trade Movement)** • Capgemini • February 2015 - May 2015
 - Analyzed, developed, and maintained the MCE system for the National Agency of Petroleum, Natural Gas, and Biofuels (ANP).
 - Ensured compliance with regulatory standards and optimized workflows for foreign trade operations.
- **ANP - SQD (Digital Qualification System)** • Capgemini • January 2015 - May 2015
 - Developed and analyzed key use cases for the digital qualification system.
 - Supported the National Agency of Petroleum, Natural Gas, and Biofuels (ANP) in achieving regulatory compliance.
 - Improved operational efficiency and data accuracy within the qualification process.
- **ANP - SIATA (Integrated System of Technical Areas and Service)** • Capgemini • November 2014 - December 2014
 - Contributed to the development and maintenance of the SIATA system (Integrated System for Technical Areas and Customer Support).
 - Supported the National Agency of Petroleum, Natural Gas, and Biofuels (ANP) in streamlining processes.

- Improved system reliability and facilitated efficient workflows for technical and customer support teams.
- **ITCD** • Capgemini • www.fazenda.mg.gov.br/empresas/impuestos/itcd • July 2013 - October 2014
 - Developed and maintained the ITCD module (Tax on Inheritance and Donation of Any Assets or Rights) within the SIARE system.
 - Supported the Secretary of Finance of Minas Gerais in ensuring tax compliance and transparency.
 - Enhanced the reliability and efficiency of the tax administration process.
- **IPVA Mobile** • Capgemini • ipva1.fazenda.mg.gov.br/ipvaonline/Home.action • June 2013 - July 2013
 - Built the frontend of the IPVA Mobile application utilizing jQuery Mobile to ensure a responsive and user-friendly interface.
 - Developed the communication middleware with Java, EJB, JAX-WS, JBoss 5.1, and Oracle WebLogic Server 12c.
 - Supported nearly 12.4 million vehicles in the state of Minas Gerais, Brazil.
- **SLIIC WEB** • SLIIC - Sistemas de Segurança Viária e Ambiental Ltda • www.sliic.com.br • October 2013 - May 2013
 - Developed and built the SLIIC ERP system.
 - Provided tracking, monitoring, and management of logistics operations.
 - Supported companies like Seqtra, Usiminas, and Raízen, ensuring operational efficiency.
- **Portal SEQTRA** • SLIIC - Sistemas de Segurança Viária e Ambiental Ltda • www.seqtra.com.br • October 2010 - May 2013
 - Designed, developed, maintained, and updated the SEQTRA portal using WordPress, PHP, and MySQL.
 - Configured and managed Cloudflare CDN for optimized performance and enhanced stability.
 - Monitored activity and response times with Pingdom, ensuring reliable uptime.
 - Implemented SEO optimizations to improve search engine visibility and audience reach.
- **SLIIC ERP** • SLIIC - Sistemas de Segurança Viária e Ambiental Ltda • www.sliic.com.br • October 2010 - May 2013
 - Developed and built the SLIIC ERP system.
 - Enabled tracking, monitoring, and controlling of logistics operations.
 - Supported client companies in optimizing their supply chain efficiency.
